KITCHENWARE WASHING PROCEDURE

1. WASH
   HOT WATER & DETERGENT

2. RINSE
   HOT WATER

3. SANITIZE
   WARM WATER & BLEACH

After washing, rinsing, and sanitizing, items may be air dried or wiped dry with disposable towels and should then be stored in a clean place.

Provide appropriate sanitizer test strips and use them to monitor the concentration of the sanitizing solution. (If using bleach, maintain the chlorine concentration between 50 and 100 parts per million; this is approximately 1 T. bleach per 1 gallon water.)

*Unscented* chlorine bleach may be used to sanitize kitchenware. Other acceptable sanitizers include quaternary ammonia and iodine.

All waste water must be disposed of properly, to either a sanitary sewer or a drainfield.
